

MistCDN Partners Fuji Television for its 40Mbps 4K Streaming
 ~ 4K VoD streaming for a newly registered World Heritage Site “Battleship Island”
 ~ MistCDN P2P network enables 40Mbps bitrate, 5x higher than YouTube

- About Mist Technologies, Inc.
 - A start-up based at the University of Tokyo
 - Received the Technology Edge Award and the Audience Award at Microsoft Innovation Award 2015 (June 2015) and the Top Award at KDDI∞Labo (July 2014)
 - Supported by IBM Global Entrepreneur Program for Cloud Startups (June 2015)
- About MistCDN
 - MistCDN is a P2P-based contents delivery platform. By establishing P2P networks among users who access the same contents, MistCDN can offload server traffic to P2P by ~80% and mitigate access concentration
 - Implemented based on JavaScript / WebRTC, MistCDN just works on normal browsersⁱ without any plugin
- Fuji Television Introduces MistCDN Technology
 - Fuji Television, the largest TV network in Japan by revenue, distributes 4K movies on their on-demand streaming service. MistCDN helps their data distribution
 - The 4K movies are about “Battleship Island”, a newly registered World Heritage Site
 - The highest bitrate is 40Mbpsⁱⁱ, which is 5x higher than YouTube 4K, 2x higher than YouTube 8K and 2.5x higher than Netflix 4K
 - Mist Technologies provides MistCDN technology and also develops a HTML5 player for 40Mbps 4K movie
 - For 800Kbps and 2Mbps, streaming with HLS format
 - For 10Mbps, 20Mbps and 40Mbps, streaming with MPEG-DASH format
